

QUICK THAW quickly melts ice, frost and snow from windshields, headlights, windows, steps, door locks, ignition locks, trunk locks, and equipment. **QUICK THAW** is a fast, simple way to thaw ice and frost. Helps prevent fogging when applied to inside of window surfaces. Improves visibility by preventing ice from buildup once applied. Improves traction of tires on extra thin ice. Will prevent ice formation for hours if used in advance.

DIRECTIONS

SHAKE WELL BEFORE USING

Brush away loose snow and ice on windshield. Be sure to keep can upright when spraying. Spray liberally on the surface to be deiced.

TO DE-ICE WINDSHIELDS: Spray liberally and turn on windshield wipers for faster results.

TO DE-ICE OTHER SURFACES: Spray liberally and rub lightly with a cloth or absorbent paper towel.

TO THAW A FROZEN LOCK: Spray liberally directly into lock; wait approximately 30 seconds, then try key. Spraying door locks once a week will prevent future freezing.

TO PREVENT FOGGING OF INSIDE WINDOWS: Wipe with a clean cloth dampened with product.

CAS NUMBERS

Isopropyl Alcohol (67-63-0), Propylene Glycol (57-55-6) and Carbon Dioxide Propellant (124-38-9).
