

POWERYATE is a concentrated blend of acids, emulsifiers, wetting agents, deflocculents and corrosion inhibitors designed for cleaning and brightening metallic heat transfer surfaces. **POWERYATE** is recommended for air conditioning coils, heating and cooling coils, condenser coils, filters, evaporators, ice machines, fans, and heat pumps.

POWERYATE generates foam action which pushes out dirt, soil, smoke, lime scale, grease and oil formed on coils. This cleansing restores energy efficiency to the unit which has been cleaned.

NOTE: Do not confuse **GMP's POWERYATE** with other products that may look or claim to be the same. There is only one **POWERYATE** and with substitutes, you may sacrifice product performance or equipment integrity.

DIRECTIONS

Shut off unit to be cleaned. Mix 1 part **POWERYATE** with 3 parts water, or set the GMP mixing sprayer to deliver a 1:3 mixture. Thoroughly spray the mixture onto the coils and allow to remain on the surface for several minutes. Reapply. Do not allow the product to dry on the coils. Rinse thoroughly with water under pressure. Do not mix this compound with other chemicals. Keep container closed when not in use. Avoid contact with glass or porcelain surfaces.

CAS Numbers: Contains (phosphoric acid 85% (7684-38-2), nonionic surfactant (9016-45-9) and phosphate ester (39454-62-1).

GENERAL MAINTENANCE PRODUCTS

POWERYATE

Heat Transfer Equipment Cleaner and Brightener

- De-Scaler, De-Ruster and De-Limer
- Controlled Cleaning Action
- Economical To Use
- Restore Energy Efficiency

CAUTION: Harmful or fatal if swallowed. Use rubber gloves and goggles when applying. See side panel for additional precautionary information.

KEEP OUT OF REACH OF CHILDREN

NET CONTENTS: 5 GAL

CAUTION

For industrial and institutional use only. Wear face and eye protection, as well as rubber gloves while using this material. Avoid breathing spray mist.

FIRST AID

IF IN EYES: Flush eyes with large quantities of water. Seek medical attention if irritation persists.

IF ON SKIN: Remove contaminated clothing. Flush exposed areas with large amounts of water. Seek medical attention if irritation persists.

IF INHALED: Get to fresh air. Resuscitate if necessary. Seek medical attention if irritation persists.

IF SWALLOWED: Do not induce vomiting. Give large quantities of water. Seek medical attention immediately.
