

EML ATF is a fully formulated multifunctional ATF fluid containing a special additive series designed to not only meet but exceed General Motors Dexron® III, Ford Mercon® and Allison C-4 specifications. It provides excellent friction durability required thereby offering satisfactory operation over the life of the vehicle.

EML ATF has excellent low-temperature fluidity to ensure proper operation of newer transmissions fitted with electronic controls and smaller orifices. Also provides oxidation stability, as measured in the GM and Ford oxidation tests, resulting in cleaner transmissions and more reliable operation.

KEEP OUT OF REACH OF CHILDREN

PRODUCT # LU919-5
